Cleveland.—"Overeating puts more people in the grave yard than overdrinking." This is the basis of the longevity rules of Dr. W. P. Horton, prominent Cleveland physician, who is sixty years old but looks forty. He says he "feels thirty," and on the old theory that "woman, poor thing, is as old as she looks, but a man's just as young as he feels," he says he is only thirty. Dr. Horton is "husky," clear-eyed, and the glow of health is reflected in his cheeks.

"I have been making a study of folks for forty years," said Dr. Horton. "The trouble with most of them is that they 'exist' too fast. They don't live. In these days we don't really eat. We swallow pre-digested foods. We drink tea, coffee and other quantities. We exist in over-heated atmospheres. We spend too much time in stuffy, unventilated street cars, and not enough in the open air. Our children, skate in indoor rinks; our men play pool and poker in smoke filled rooms; our women play bridge in close drawing rooms. If there was more walking to school by children; walking at least part of the way to the office by men; and walking to market by the women, we would all be better off. This actuality is telling on us. Instead of controlling our muscles and nerves, our muscles and nerve control us.

McClain, the millionaire manufacturer of that village.

**COD LIVER OIL AND IRON**  
Two Most World-Famed Tonics Combined in Vinol.

Cod Liver oil and Iron have proved to be the two most successful tonics the world has ever known—iron for the blood and the medicinal curative elements of cod liver oil as a strength and tissue builder for body and nerves, and for the successful treatment of throat and lung troubles.

Two eminent French chemists discovered a method of separating the curative medicinal elements of the cod's livers from the oil or grease which is thrown away, but to these medicinal elements tonic iron is now added, thus combining in Vinol the two most world-famed tonics.

As a body-builder and strength creator for weak, run-down people, for feeble old people, delicate children, for restore strength after sickness; and for chronic coughs, colds, bronchitis or pulmonary troubles we ask you to try Vinol with the understanding that your money will be returned if it does not help you. The pressure of public business is such that our Presidents must sign their names to documents some twenty thousand times a year. Heads of departments, also, must spend a good portion of their time writing their signatures. The heaviest name signer in the government service is said to be the chief of the division of warrants in the treasury department.

**NEW MODEL OF BOAT**

To Be Used On Ohio.—To Be Generally Used When Lock System Is Finished and Will Make Much Better Time.

Since the lock and dam improvement on the Ohio River has been all but completed, the prominent river men of the country are concentrating their thoughts on new type of river packet, which will make better time than old steamers and still have equal capacity.

Some of the new boats are already under construction in the east, equipped with crude oil burners. Steamers of the older type, with Texas cabins and high smoke funnels, will not be seen in the days to come. The modern day capitalist, in the river business, like all other lines is trying to attain efficiency, and to do so, the old lumbering steamers, though beautiful, will be forced to give way. More capacity is attained by the oil burners. The engines will develop 200 horse power and can run at 13 miles an hour pace. The crafts will be lower, but more spacious and comfortable. Smoke will be eliminated. Two wheels will be used, each independent. It is estimated that 25 tons of freight can be carried a mile at a cost of but one cent, figuring on the present crude and lubricating oils.

**READ ADVERTISEMENTS.**

It is not alone the people who are interested in trade who read advertisements. Few people nowadays buy either newspapers or magazines who do not read these cleverly worded and well illustrated bids for business. If you should ask the average person just why he or she is in the habit of looking over the advertisements, the chances are that you would get no direct and satisfactory answer, but the real fact is that subconsciously the public has come to regard what appears in the advertising columns as interesting reading matter.
